#### A Patent Horseshoe.

A patent covers a horseshoe which possesses many advantages. On its under surface is stamped a pattern which gives a number of points for the securing of a better grip on the pavement, and this, where wooden pavements are used, is an important consideration. The shoe is about half the weight of an ordinary shoe, being two and a half pounds the set of four; it takes less time and less money to fix, has only four nails, as against the usual seven. Being a three-quarter shoe, it leaves the frogs and heels on the ground

—which prevents concussion to the foot and leg, contraction and corns.

The only preparation the hoof requires

after the old shoe is taken off is that the rasp must be used on the toe and quarters, making a reduction of about one-eighth of an inch on the lower side of the hoof.

The frog and heels and back part of the foot should not be touched. This

shoe is made in accordance with the well

established principle that the more the

binder part of the foot—which is very

tough—is used, the harder and healthier

it becomes.—New York Telegram.

#### Policeman and Model.

There is a big, picturesque policeman

on the Broadway squad who is noted

among the habitues of the Rialto for his

flowing blond mustache, who turns an

occasional dollar as an artist's model.

Having posed during his watch on deck

for the benefit of the common people in

the flesh, he is transferred to imperishable canvas to gladden the artistic eye of

generations yet to come. He has the

trunk and arms of a giant. In the opin-

ion of a distinguished artist, this police-

man is the best specimen of massive

physical perfection he ever saw. Of

course, the lady artists have all had a

hank at him with pencil and brush, for

which he invariably gets one dollar a sit-

ting. No wonder he carries the air of a

man thoroughly satisfied with himself.

#### Beware of Ointments for Catarrh that contain Mercury.

as mercury will surely destroy the sense of

smell and completely derange the whole system

when entering it through the mucous surfaces.

Such articles should never be used except on

prescriptions from reputable physicians, as the

damage they will do is ten fold to the good

you can possibly derive from them. Hall's

Catarrh Cure, manufactured by F. J. Cheney

& Co., Toledo, O., contains no mercury, and

is taken internally, and acts directly upon the

blood and mucous surfaces of the system. In

buying Hall's Catarrh Cure be sure you get the

genuine. It is taken internally, and made in

Toledo, Ohio, by F. J. Cheney & Co.

Sold by Druggists, price 75c. per bottle.

An old physician, retired from practice,

having had placed in his hands by an East

India missionary the formula of a simple

vegetable remedy for the speedy and permanent

cure of Consumption, Bronchitis, Catarrh,

Asthma and all throat and lung Affections,

is a positive and radical cure for Nervous

Irregularity and all Nervous Complaints, after

having tested its wonderful curative powers in

thousands of cases, has felt it his duty to make

it known to his suffering fellows. Actuated by

his motives and a desire to relieve human

suffering, he will send free of charge, to all who

desire it, this recipe, in German, French or

English, with full directions for preparing and
